

Schine Pill Box L

Product description

- Roller shutter system makes it easy to open and close.
- No protruding parts.
- Large chambers with rounded corners.
- Contrast-coloured base makes tablets easily visible.
- Easily accessible prescription card.
- Removable inner box.
- Possible to stack.
- Dishwasher-safe.

Schine Pill Box L offers a new way of storing/dispensing pills. The roller shutter system makes the chambers easy to open and close, with no irritating protruding parts.

The large model contains 7x4 chambers to be used for one week's dosage. The weekdays are clearly marked and the four chambers for each day numbered 1-4. They are also marked with symbols for the different times of the day.

The removable inner box makes it easy to empty stored pills. The box can be opened, closed and locked. It is dishwasher-safe (please notice – not the plastic pocket).

The boxes can be stacked, a lock on the upper- and underside keep them in place.

Thanks to the transparent shutter and coloured base, you can easily tell if the chamber is full. The Schine Box L comes in two colours, red and blue.

We own the Swedish patent.

Recommendations for users

- Keep the Schine Pill Box L out of reach of children.
- Be careful when loading the box so the right pill is put into the correct chamber.
- Be aware if some medication/pill is to be stored in a certain way.
- The supplier shall not be liable for incorrect use of Schine Pill Box L, or where dosage of medicine is incorrect.
- Schine Pill Box L is dishwasher-safe in the upper part of the dishwasher (please notice – not the plastic pocket.).
- We recommend that you wash the box when changing medicine.
- Please make sure that all parts are dry before loading the box.
